GOLD BUTE®

ACTIVE CONSTITUENT: PHENYLBUTAZONE 200 mg/mL

ANTI-INFLAMMATORY ORAL PASTE FOR HORSES

An aid in the treatment of musculo-skeletal conditions and soft tissue injuries in horses where anti-inflammatory, antipyretic and analgesic activity would be beneficial.

DIRECTIONS FOR USE

For oral use only.

CONTRAINDICATIONS

The product is contraindicated in animals with cardiac, renal or hepatic disorders, blood dyscrasias or pre-existing gastrointestinal tract ulceration.

DOSAGE AND ADMINISTRATION:

Horses: Administer orally prior to feeding. 4.4 mg/kg (10 mL/450 kg) bodyweight twice daily for the first day; 2.2 mg/kg (5 mL/450 kg) bodyweight twice daily for the next four days; 2.2 mg/kg (5 mL/450 kg) once daily on alternate days or as directed by a veterinarian. Maximum daily dose should not exceed 4 grams (20 mL).

Ponies: Administer orally prior to feeding. 2.2 mg/kg (2.5 mL/225 kg) bodyweight twice daily for four days; 2.2 mg/kg (2.5 mL/225 kg) once daily on alternate days or as directed by a veterinarian.

MEAT WITHHOLDING PERIOD (HORSES):

NOT TO BE USED in horses intended for human consumption.

If used in performance animals, regulations of relevant authorities regarding medication should be observed.

PRECAUTIONS

Phenylbutazone should not be combined with other NSAIDs or other highly protein bound drugs, such as digoxin, warfarin, and sulfonamides.

SIDE EFFECTS

Potential adverse effects of phenylbutazone include anorexia, depression, colic, weight loss, ventral oedema, oral and gastrointestinal lesions including ulcers, and renal papillary necrosis. Ponies exhibit an increased sensitivity to the toxic effects of phenylbutazone. If any of these signs occur, discontinue treatment immediately.

FIRST AID

If poisoning occurs, contact a doctor or Poisons Information Centre. Phone Australia 131 126; New Zealand 0800 764 766.

DISPOSE of empty container by wrapping with paper and putting in garbage.

STORE below 25°C (Air conditioning). Protect from light.
